ANNUAL INDEX

Control Engineering Volume 17 . . . January—December 1970

(N) News **(D&S) Devices & Systems**

(ABL) Around the Business Loop **(ED) Editorial**

Actuators

Modeling a thyristor dc motor control. F. Lutz Apr. 70
Position control with a synchronous motor. O. Krauer . . . . . May 66
The brushless dc motor: link to versatility. R. A. Fink . . . . . June 75
The brushless motor: types and sources. R. A. Fink . . . . . Aug. 42
Use electrohydraulic stepping motors for all-digital drives. P. N. Budzilovich. . . . . Jan. 82

Aircraft

Future cockpits may get dual sidearm controller (N) . . . . . Mar. 46
Minicomputer manages aircraft data collection (D&S) . . . . . Dec. 42
Quickened "diskey" eases pilot's workload (D &S) . . . . . Apr. 62

Amplifiers

A high-power switching amplifier. J. A. Ross July 50

Analog to digital conversion

A precision A-to-D converter for nonlinear conversion. W. C. Lin . . . . . Apr. 92
Minicomputerizing analog data collection. P. J. Torpey . . . . . June 69

Analysis instruments

Automatic chemical analysis replaces 100 lab techs (D&S) . . . . . Feb. 84
New octane monitor continuously analyzes gasoline (D&S) . . . . . Sept. 44
On-line stream analysis with a chromatograph. R. D. McCoy & B. O. Ayres . . . . . July 44

Circuits

A linear platinum resistance temperature detection circuit. Logan & Cook . . . . . Dec. 58
Don't overlook compatible NAND and NOR gates in reducing logic. L. B. Frenzel Jr. Oct. 70
Electromechanical interlock protects instrument during out-of-range operations (D&S) Dec. 43
6 ways to control temperature. A. M. Willer May 86
Simple linear or logarithmic light-level measurement (D&S) . . . . . Feb. 79
Solid state circuit replaces mechanical balancing relay (D&S) . . . . . June 54
Solid state sensors: strain gages. R. Iltis . Jan. 71
Some solutions to IC power supply problems. W. D. Miller . . . . . Nov. 64
Starting circuit makes subsequencers start on time (D&S) . . . . . Oct. 55
Systematic approach aids in fluidic system design. I. Kenig . . . . . Mar. 76
The brushless dc motor: link to versatility. R. A. Fink . . . . . June 75
Transient noise suppression in control systems. F. G. Willard . . . . . Sept. 59

Components

A high-power switching amplifier. J. A. Ross July 50
A precision A-to-D converter for nonlinear conversion. W. C. Lin . . . . . Apr. 92
"Custom" complex logic being offered by TI (N) . . . . . Apr. 53
Fluidic components control bottle-filling machine (D&S) . . . . . Nov. 45
Growing servo market seen in Germany (ABL) Apr. 141
New wrinkle in thumbwheel switches eliminates intermediate contact (D&S) . . . . . Oct. 56
Peripheral components: keyboards/incremental tapes/crt display units. E. J. Kompass . Feb. 135
Solid-state capacitor expands designers' range (D&S) . . . . . May 62
The brushless dc motor: link to versatility. R. A. Fink . . . . . June 75
The brushless motor: types and sources. R. A. Fink . . . . . Aug. 42

Computer peripherals

Attache case terminals let computers have any location (N) . . . . . Mar. 43
Buyer's guide. M. J. Kashman . . . . . Feb. 142
CRT terminals make versatile control computer interfaces. R. L. Aronson . . . . . Apr. 66
Data links and networks—devices and techniques. R. L. Aronson . . . . . Feb. 105
High-speed input-output devices and techniques. G. Lapidus . . . . . Feb. 117
Interdata readies new computer peripherals (N) Apr. 54
Modular interfaces mate incompatibles. E. J. Kompass . . . . . Feb. 140
Peripheral components: keyboards/incremental tapes/CRT display units. E. J. Kompass Feb. 135
Putting memories to work on-line. S. J. Bailey 126
Terminals: on-line and off, conversational and batch. D. H. Surgan . . . . . Feb. 96
What's happening to peripherals? R. L. Aronson . . . . . Feb. 88

Computer programming

One year later: computer systems firms continue to multiply and prosper. D. H. Surgan Jan. 65
Status of minicomputer software. R. H. Temple & R. E. Daniel . . . . . July 61
Third software workshop held at Purdue University (N) . . . . . Apr. 56
Using the PROSPRO I supervisory control equation as a ddc algorithm. M. A. Javinsky Nov. 57
What to expect when you scale down to a minicomputer. J. J. Morris . . . . . Sept. 65

Computers (see also Information systems)

A computerized file management system for manufacturing control. C. A. Renouard Dec. 60
At Owens-Illinois it's computer to computer (N) . . . . . Sept. 38
Burroughs is the latest with new big computers (N) . . . . . Nov. 40
Cincinnati Milacron gets first big order for minis (N) . . . . . Oct. 48
Computer-behavior monitor features an associative memory (D&S) . . . . . Jan. 60
Computer gap challenges East Germany (N) Sept. 37
Computerizing Fourier analysis. J. R. Guerriero . . . . . Mar. 89
Computer sales: IBM slips a bit (ABL) . . Apr. 142
Computers control thruway speeds in Britain (D&S) . . . . . May 59
Computer system maintenance in the unbundled era. K. E. Carey . . . . . June 79
Computer time allocation eases on-line problems. W. Cunneen . . . . . Mar. 71
CRT terminals make versatile control computer interfaces. R. L. Aronson . . . . . Apr. 66
DDA computes elevator travel curve. P. G. Mesniaeff . . . . . Sept. 76
DEC backwash launches competitor (N) . Apr. 54
DEC has new '8' mini, new '15' software pack (N) . . . . . July 31
DEC unveils low-cost PDP-11 for the OEMer (N) . . . . . Oct. 50
Five new minicomputers bow here and abroad (N) . . . . . Nov. 39
FJCC: new names vie at Vegas (N) . . . . . Jan. 41
GE process computer is modular for flexibility (N) . . . . . Jan. 50
GEC/Elliott launches process computer line (N) . . . . . Feb. 70
GE/PAC 4020 puts a dutch mill on-stream (N) Mar. 48
Honeywell and GE get it all together in HIS (N) . . . . . Oct. 50
Interdata readies new computer peripherals (N) Apr. 54
Justifying computerized testing. D. J. Bilinski Apr. 82
Low-cost 16-bit PDP-11 easy to program. (N) Jan. 44
Minicomputer counts phone calls (D&S) . Feb. 82
Minicomputer is the brains behind electrohydraulic control system (D&S) . . . . . Oct. 56
Minicomputerizing analog data collection. P. J. Torpey . . . . . June 69
Minicomputer manages aircraft data collection (D&S) . . . . . Dec. 42
Minicomputers abroad—what's available. G. Lapidus . . . . . Nov. 66
Minicomputer watches 1,368 machines (D&S) Jan. 57
New computers: Univac's biggest, IBM's smallest (N) . . . . . Dec. 36
Of process computers and manpower (ABL) Nov. 97
On-line production tracking aids integrated management systems. R. A. P. Peters & F. Thumser . . . . . Jan. 89
On-line tradeoff: hardware versus software. L. Babiloni & others . . . . . Oct. 84
Redundancy, arithmetic keep processor on line (N) . . . . . May 53
Semiconductor main memory for newest System/370 (N) . . . . . Nov. 35
SJCC '70: terminals, minis and wind (N) June 43
Status of minicomputer software. R. H. Temple & R. E. Daniel . . . . . July 61
System/360 successor? IBM declines to say (N) July 31
The IBM 370: elbow room for 360 users (N) Aug. 34
The two faces of a computer (ED) . . . . . Feb. 222
The utility concept for optimum costing of computer applications. T. J. Counas . . Oct. 88
Two approaches to multiprocessing system design. Thomas & Arbuckle . . . . . Oct. 79
Varian cuts 520 price, shows faster 620 (N) May 54

Third software workshop held at Purdue University (N) . . . . . Apr. 56
Using the PROSPRO I supervisory control equation as a ddc algorithm. M. A. Javinsky Nov. 57
What to expect when you scale down to a minicomputer. J. J. Morris . . . . . Sept. 65

Computers (see also Information systems)

A computerized file management system for manufacturing control. C. A. Renouard Dec. 60
At Owens-Illinois it's computer to computer (N) . . . . . Sept. 38
Burroughs is the latest with new big computers (N) . . . . . Nov. 40
Cincinnati Milacron gets first big order for minis (N) . . . . . Oct. 48
Computer-behavior monitor features an associative memory (D&S) . . . . . Jan. 60
Computer gap challenges East Germany (N) Sept. 37
Computerizing Fourier analysis. J. R. Guerriero . . . . . Mar. 89
Computer sales: IBM slips a bit (ABL) . . Apr. 142
Computers control thruway speeds in Britain (D&S) . . . . . May 59
Computer system maintenance in the unbundled era. K. E. Carey . . . . . June 79
Computer time allocation eases on-line problems. W. Cunneen . . . . . Mar. 71
CRT terminals make versatile control computer interfaces. R. L. Aronson . . . . . Apr. 66
DDA computes elevator travel curve. P. G. Mesniaeff . . . . . Sept. 76
DEC backwash launches competitor (N) . Apr. 54
DEC has new '8' mini, new '15' software pack (N) . . . . . July 31
DEC unveils low-cost PDP-11 for the OEMer (N) . . . . . Oct. 50
Five new minicomputers bow here and abroad (N) . . . . . Nov. 39
FJCC: new names vie at Vegas (N) . . . . . Jan. 41
GE process computer is modular for flexibility (N) . . . . . Jan. 50
GEC/Elliott launches process computer line (N) . . . . . Feb. 70
GE/PAC 4020 puts a dutch mill on-stream (N) Mar. 48
Honeywell and GE get it all together in HIS (N) . . . . . Oct. 50
Interdata readies new computer peripherals (N) Apr. 54
Justifying computerized testing. D. J. Bilinski Apr. 82
Low-cost 16-bit PDP-11 easy to program. (N) Jan. 44
Minicomputer counts phone calls (D&S) . Feb. 82
Minicomputer is the brains behind electrohydraulic control system (D&S) . . . . . Oct. 56
Minicomputerizing analog data collection. P. J. Torpey . . . . . June 69
Minicomputer manages aircraft data collection (D&S) . . . . . Dec. 42
Minicomputers abroad—what's available. G. Lapidus . . . . . Nov. 66
Minicomputer watches 1,368 machines (D&S) Jan. 57
New computers: Univac's biggest, IBM's smallest (N) . . . . . Dec. 36
Of process computers and manpower (ABL) Nov. 97
On-line production tracking aids integrated management systems. R. A. P. Peters & F. Thumser . . . . . Jan. 89
On-line tradeoff: hardware versus software. L. Babiloni & others . . . . . Oct. 84
Redundancy, arithmetic keep processor on line (N) . . . . . May 53
Semiconductor main memory for newest System/370 (N) . . . . . Nov. 35
SJCC '70: terminals, minis and wind (N) June 43
Status of minicomputer software. R. H. Temple & R. E. Daniel . . . . . July 61
System/360 successor? IBM declines to say (N) July 31
The IBM 370: elbow room for 360 users (N) Aug. 34
The two faces of a computer (ED) . . . . . Feb. 222
The utility concept for optimum costing of computer applications. T. J. Counas . . Oct. 88
Two approaches to multiprocessing system design. Thomas & Arbuckle . . . . . Oct. 79
Varian cuts 520 price, shows faster 620 (N) May 54

What are the Soviets doing in computers? (N) July 29
What's happening to peripherals? R. L. Aronson ... Feb. 88
What to expect when you scale down to a minicomputer. J. J. Morris ... Sept. 65

Computing control

Automatic chemical analysis replaces 100 lab techs (D&S) ... Feb. 84
BART simulated run proves out controls (N) May 52
Computers control thruway speeds in Britain (D&S) ... May 59
Computer time allocation eases on-line problems. W. Cunneen ... Mar. 71
CRT terminals make versatile control computer interfaces. R. L. Aronson. ... Apr. 66
Direct nc package developed by DEC (N) Aug. 34
Economic justification for digital control of a batch process. R. G. Fritchie & E. F. Schagrin ... July 54
Ex-Cell-O at NMTBA: a multimachine controller (N) ... Oct. 48
GE/PAC 4020 puts a dutch mill on-stream (N) May 48
Huge Getty oil line gets minicomputer control (N) ... Apr. 54
Interactive control of paper machines. E. B. Dahlin ... Jan. 76
Minicomputer is the brains behind electrohydraulic control system (D&S) ... Oct. 56
On-line computer runs nc machines (N) .. Mar. 41
On-line tradeoff: hardware versus software. L. Babiloni & others ... Oct. 84
Process computers control satellite ground station (N) ... Feb. 70
Protecting the computer in a process environment. Neumann & Riley ... Sept. 72
Siemens to automate cold strip mill (N) . June 47
Sun puts refinery under Foxboro ddc (N) Mar. 43
Three machine tool shows—or were they control shows? It was hard to tell. ... Nov. 53
Two approaches to multiprocessing system design. Thomas & Arbuckle ... Oct. 79
Univac 1106 to optimize while 1800 supervises (N) ... Nov. 38
What to expect when you scale down to a minicomputer. J. J. Morris ... Sept. 65

Controllers

Barber-Colman unveils process controller line (N) ... Aug. 34
Core memory controls production line. A. A. Vagge ... Aug. 46
Design rule decision: rectangular or trapezoidal? R. Uram ... May 94
Fisher unveils ac process controllers. (N) Jan. 46
Fluidic process controller scores on-line. Calvin & Streett Jr. ... Oct. 63
High temperature controller maintains tight differential (D&S) ... Apr. 60
One digital controller for 16 ddc loops. Ray & Poll ... Apr. 75
Programmable controller is inexpensive, versatile (N) ... Oct. 48
6 ways to control temperature. A. M. Willer May 86
Solid state circuit replaces mechanical balancing relay (D&S) ... June 54
Square tubing helps maintain adjustment of linkages (D&S) ... Sept. 43
What price process instrument evaluation? Smith & Burton ... Dec. 50

Data collection (see also Information systems)

Bulb maker keeps in-machine data collectors "honest" R. L. Aronson ... Aug. 53
Minicomputerizing analog data collection. P. H. Torpey ... June 69
Minicomputer manages aircraft data collection (D&S) ... Dec. 42
Minicomputer watches 1,368 machines (D&S) Jan. 57
On-line tradeoff: hardware versus software. L. Babiloni & others ... Oct. 84
Tape loop controls data collection through dial-up network ... July 38

Data transmission (see also Information systems)

Britain to build network for data transmission (N) ... Jan. 46
Building control networks uses 2-wire transmission (N) ... June 46
Data links and networks—devices and techniques. R. L. Aronson ... Feb. 105
Data network lets Mohammed and the mountain stay put (D&S) ... Jan. 62
Remote diagnostics keep data net on-line (N) July 29
Tape loop controls data collection through dial-up network ... July 38
Would-be data carriers encouraged by FCC (N) ... Sept. 37

Detection

A linear platinum resistance temperature detection circuit. Logan & Cook ... Dec. 58
Fluidic sensor detects double sheets (D&S) July 36
Improving remote sensing of contact closures (D&S) ... Mar. 56
Metal strip inspected by flying-field scanning (D&S) ... June 51
Temperature labels simplify operator checks (D &S) ... June 52

Digital filters

Applying digital filtering on line. R. Merkel Jan. 92
The digital IC filter: a low-cost signal processing tool. S. A. White & T. Mitsutomi . June 58

Digital servos

Reversible step servo automatically returns to zero position (D&S) ... Nov. 46
Roll feed drive is digitally controlled (D&S) Apr. 59
Use electrohydraulic stepping motors for all-digital drives. P. N. Budzilovich. ... Jan. 82

Digital techniques

All-digital gravimetic feeder satisfies process appetite (D&S) ... Dec. 41
Applying digital filtering on line. R. Merkel Jan. 92
Core memory controls production line. A. A. Vagge ... Aug. 46
DDA computes elevator travel curve. P. G. Mesniaeff ... Sept. 76
Design rule decision: rectangular or trapezoidal? R. Uram ... May 94
Digital techniques automate resistor testing (D &S) ... Jan. 62
Discrete simulation: new tool for control and system design. J. M. Burling ... May 77
One digital controller for 16 ddc loops. Ray & Poll ... Apr. 75
Pressure transducer produces digital output (D &S) ... May 64
Simulation of discrete processes: the seldom-used tool (ED) ... June 144
Starting circuit makes subsequencers start on time (D&S) ... Oct. 55
The digital IC filter; a low-cost signal processing tool. S. A. White & T. Mitsutomi . June 58

Direct digital control

Interactive control of paper machines. E. B. Dahlin ... Jan. 76
One digital controller for 16 ddc loops. David J. Ray & A. Poll ... Apr. 75
Sun puts refinery under Foxboro ddc (N) Mar. 43
Using the PROSPRO I supervisory control equation as a ddc algorithm. M. A. Javinsky Nov. 57

Economics

Economic justification for digital control of a batch process. R. G. Fritchie & E. F. Schagrin ... July 54
Justifying computerized testing. D. J. Bilinski Apr. 82
MAPCAST:GE shares its forecasting know-how (N) ... Oct. 51
The utility concept for optimum costing of computer applications. T. J. Counas .. Oct. 88

Editorials

Consult the users (ED) ... Aug. 82
Hot year for new control products (ED) . May 152
Now we're one too (ED) ... Oct. 128
Ouija board manipulators generate expensive trivia (ED) ... Apr. 152
Simulation of discrete processes: the seldom-used tool (ED) ... June 144
Soft markets, elusive profits: an opportunity for control (ED) ... Mar. 144
Strangers in our midst (ED) ... Nov. 104
Systems vs nonsystems (ED) ... July 104
The decade of engineering (ED) ... Jan. 144
The logical black box (ED) ... Sept. 112
The pressure for change (ED) ... Dec. 96
The two faces of a computer (ED) ... Feb. 222

Education

More on control courses: a look-ahead to the Fall (N) ... Aug. 34
Short control courses: filling out the fall list (N) Sept. 38
Short courses in control: summer 1970. H. W. Kayes ... May 98
Short courses: the first ones for 1971 look good (N) ... Dec. 37
The first correspondence course in NC is ready (N) ... Oct. 50

Environmental control

Building control network uses 2-wire transmission (N) ... June 46

Flow, fluid

Applying gas flow computers. B. Liptak . Dec. 46
Ultrasonic flowmeter measures without touching (D&S) ... Aug. 40

Fluidics

Fluidic components control bottle-filling machine (D&S) ... Nov. 45
Fluidic process controller scores on-line. Calvin & Streett Jr. ... Oct. 63
Fluidic sensor detects double sheets (D&S) July 36
Fluidic sequencer is assembled with standard logic modules (D&S) ... Aug. 39
Fluidics marketing in England—good show (ABL) ... May 135
Systematic approach aids in fluidic system design. I. Kenig ... Mar. 76
U. S. fluidics industry sales: small but growing (ABL) ... Mar. 131

Foreign control

Computer gap challenges East Germany (N) Sept 37
Computers control thruway speeds in Britain (D&S) ... May 59
Control in Europe: new computers, installations (N) ... Feb. 68
Fluidics marketing in England—good show (ABL) ... May 135
GEC/Elliott launches process computer line (N) ... Feb. 70
GE/PAC 4020 puts a dutch mill on-stream (N) Mar. 48
In-plant control stars at London IEA meeting (N) ... July 30
Minicomputer is the brains behind electrohydraulic control system (D&S) ... Oct. 56
Siemens to automate cold strip mill (N) . June 47
U. K. makes hay in East Europe control market (ABL) ... June 131
What are the Soviets doing in computers? (N) July 29

Industrial control

At Owens-Illinois it's computer to computer (N) ... Sept. 38
Building control networks uses 2-wire transmission (N) ... June 46
Bulb maker keeps in-machine data collectors "honest." R. L. Aronson ... Aug. 53
Direct nc package developed by DEC (N) Aug. 34
Ex-Cell-O at NMTBA: a multimachine controller (N) ... Oct. 48
Fluidic components control bottle-filling machine (D&S) ... Nov. 45
Fluidic sensors protect dies (D&S) ... May 62
GE/PAC 4020 puts dutch mill on-stream (N) Mar. 48

Industrial robot peens complex aircraft parts (D&S) ... Nov. 46
In-gap gaping improves strip mill control. F. Guetbauer ... July 57
In-plant sensors help schedule work and watch costs in brass rod mill. R. L. Aronson . July 40
Laser instrument gauges fine wires and fibers (D&S) ... Oct. 58
MAPCAST: GE shares its forecasting know-how (N) ... Oct. 51
Modeling a thyristor dc motor control. F. N. Lutz ... Apr. 70
NC-based integrated manufacturing for IBM (N) ... Aug. 33
On-line computer runs nc machines (N) .. Mar. 41
Open-loop contouring is fast and simple (N) May 51
Reversible step servo automatically returns to zero position (D&S) ... Nov. 46
Roll feed drive is digitally controlled (D&S) Apr. 59
The first correspondence course in nc is ready (N) ... Oct. 50
Three machine tool shows—or were they control shows? It was hard to tell. ... Nov. 53
Transient noise suppression in control systems. F. G. Willard ... Sept. 59

Information systems

A computerized file management system for manufacturing control. C. A. Renouard. Dec. 60
Bulb maker keeps in-machine data collectors "honest." R. L. Aronson ... Aug. 53
Computer system maintenance in the unbundled era. K. E. Carey ... June 79
Data network lets Mohammed and the mountain stay put (D&S) ... Jan. 62
Discrete simulation: new tool for control and system design. J. M. Burling. ... May 77
In-plant sensors help schedule work and watch costs in brass rod mill. R. L. Aronson . July 40
Manufacturing information and control system design. C. A. Renouard. ... Sept. 78
Minicomputer counts phone calls (D&S) . Feb. 82
Minicomputer watches 1,368 machines (D&S) Jan. 57
NC-based integrated manufacturing for IBM (N) ... Aug. 33
On-line production tracking aids integrated management system. R. A. P. Peters & F. Thumser ... Jan. 89
Plastic keys aid production monitoring (D&S) Sept. 44

Instrumentation

Electromechanical interlock protects instrument during out-of-range operations (D&S) Dec. 43
In-gap gaging improves strip mill control. F. Guetbauer ... July 57
Instrument evaluation: catch as catch can. (ABL) ... Jan. 127
Instrumentation sales: 1970 looks good. (ABL) Feb. 203
Laser automatically operates earth-moving equipment (D&S) ... Dec. 42
Laser instrument gauges fine wires and fibers (D&S) ... Oct. 58
Moisture content in ceramic clays measured on-line (D&S) ... Aug. 40
Water, water everywhere, but—H. F. Hanson & A. Hess ... May 72
What price process instrument evaluation. Smith & Burton ... Dec. 50

Instrument evaluation

Instrument evaluation: catch as catch can. (ABL) ... Jan. 127
What price process instrument evaluation? H. G. Smith & J. S. Burton ... Dec. 50

Integrated circuits

A glossary of IC terms. G. Lapidus. ... Aug. 50
"Custom" complex logic being offered by TI (N) ... Apr. 53
ISSCC wrapup—1970: the year of the IC memory (N) ... Apr. 53
New IC for zero-crossing switching (D&S) Jan. 58
Semiconductor main memory for newest System/370 (N) ... Nov. 35
Some solutions to IC power supply problems. W. D. Miller ... Nov. 64
The digital IC filter: a low-cost signal processing tool. S. A. White & T. Mitsutomi June 58

Interfacing with computers

A precision A-to-D converter for nonlinear conversion. W. C. Lin ... Apr. 92
CRT terminals make versatile control computer interfaces. R. L. Aronson. ... Apr. 66
Improving remote sensing of contact closures (D&S) ... Mar. 56
Minicomputerizing analog data collection. P. J. Torpey ... June 69
Modular interfaces mate incompatibles. E. J. Kompass ... Feb. 140
The two faces of a computer (ED) ... Feb. 222

Logic and logic devices

"Custom" complex logic being offered by TI (N) ... Apr. 53
Don't overlook compatible NAND and NOR gates in reducing logic. L. B. Frenzel Jr. Oct. 70
Fluidic sequencer is assembled with standard logic modules (D&S) ... Aug. 39
Programmable controller is inexpensive, versatile (N) ... Oct. 48
The logical black box (ED) ... Sept. 112

Machine control

Angle transducer uses differential capacitance (D&S) ... Mar. 56
DDA computes elevator travel curve. P. G. Mesniaeff ... Sept. 76
Direct nc package developed by DEC (N) Aug. 34
Electric antibacklash drive (D&S) ... July 35
Ex-Cell-O at NMTBA: a multimachine controller (N) ... Oct. 48
Fluidic components control bottle-filling machine (D&S) ... Nov. 45
Fluidic sensor detects double sheets (D&S) July 36
Fluidic sensors protect dies (D&S) ... May 62
Fluidic sequencer is assembled with standard logic modules (D&S) ... Aug. 39
Industrial robot peens complex aircraft parts (D&S) ... Nov. 46
NC-based integrated manufacturing for IBM (N) ... Aug. 33
On-line computer runs nc machines (N) .. Mar. 41
Open-loop contouring is fast and simple (N) May 51
Position control with a synchronous motor. O. Krauer ... May 66
Rapid prediction of feedback system response peaking. J. Graeme ... Oct. 82
Reversible step servo automatically returns to zero position (D&S) ... Nov. 46
Roll feed drive is digitally controlled (D&S) Apr. 59
The first correspondence course in nc is ready (N) ... Oct. 50
The logical black box (ED) ... Sept. 112
Three machine tool shows—or were they control shows? It was hard to tell. ... Nov. 53

Maintenance

Computer system maintenance in the unbundled era. K. E. Carey ... June 79
Remote diagnostics keep data net on-line (N) July 29

Manufacturing

A computerized file management system for manufacturing control. C. A. Renouard Dec. 60
At Owens-Illinois it's computer to computer (N) ... Sept. 38
Bulb maker keeps in-machine data collectors "honest." R. L. Aronson ... Aug. 53
In-plant sensors help schedule work and watch costs in brass rod mill. R. L. Aronson . July 40
Laser balances gyro and other high-speed precision rotors (D&S) ... Mar. 55
Manufacturing information and control system design. C. A. Renouard. ... Sept. 78
NC-based integrated manufacturing for IBM (N) ... Aug. 33

Marketing

Bright spots still illuminate control market (ABL) ... July 93
Computer sales: IBM slips a bit (ABL) .. Apr. 142
Control market bullish despite bearish economy. D. H. Surgan ... May 90
Fluidics marketing in England—good show (ABL) ... May 135
Growing servo market seen in Germany (ABL) Apr. 141
Honeywell and GE get it all together in HIS (N) ... Oct. 50
Honeywell and GE: new muscle, new directions (ABL) ... Oct. 119
Hot year for new control products (ED) . May 152
Instrumentation sales: 1970 looks good. (ABL) Feb. 203
Ouija board manipulators generate expensive trivia (ED) ... Apr. 152
Memory costs to flatten, thanks to LSI (ABL) Apr. 141
Pneumatic-like prices, 'prefabs' for GE-MAC (N) ... Nov. 36
Recession snares control (but it may be too late)(ABL) ... Sept. 103
Soft markets, elusive profits: an opportunity for control (ED) ... Mar. 144
Solid state sets new trends in motor drives. P. G. Mesniaeff ... Oct. 73
Systems vs nonsystems (ED) ... July 104
U. S. fluidics industry sales: small but growing (ABL) ... Mar. 131
U. K. makes hay in East Europe control market (ABL) ... June 131

Measuring

A linear platinum resistance temperature detection circuit. Logan & Cook ... Dec. 58
Applying gas flow computers. B. Liptak . Dec. 46
Automated comparator makes for a smoother ride (D&S) ... June 56
Capacitance change senses differential pressure (D&S) ... June 52
Cooling water monitored in flow-through probes (D&S) ... Feb. 80
How octane monitor continuously analyzes gasoline (D&S) ... Sept. 44
In-gap gaging improves strip mill control. F. Guetbauer ... July 57
Laser automatically operates earth-moving equipment (D&S) ... Dec. 42
Laser instrument gauges fine wires and fibers (D&S) ... Oct. 58
Moisture content in ceramic clays measured on-line (D&S) ... Aug. 40
Oddball and not so oddball applications of optical position sensors (D&S) ... Apr. 64
On-line stream analysis with a chromatograph. R. D. McCoy & B. O. Ayres. ... July 44
Simple linear or logarithmic light-level measurement (D&S) ... Feb. 79
Solid state sensors: strain gages. R. Iltis . Jan. 71
System identification by on-line correlation. D. Dack ... Mar. 64
Ultrasonic flowmeter measures without touching (D&S) ... Aug. 40
Water, water everywhere, but—H. F. Hanson & A. Hess ... May 72

Meetings, news reports

FJCC: new names vie at Vegas (N) ... Jan. 41
IEEE 1970: the big show wasn't so big (N) May 51
IFAC in Japan: worth reading past the titles (N) ... Oct. 47
In-plant control stars at London IEA meeting (N) ... July 30
ISA has satisfying 25th birthday in a lean year (N) ... Dec. 35
ISSCC wrapup—1970: the year of the IC memory (N) ... Apr. 53
NEREM 70 reflects state of the industry (N) Dec. 35
SJCC '70: terminals, minis and wind (N) June 43
Symposium features control valves of the Seventies (N) ... May 54
Three machine tool shows—or were they control shows? It was hard to tell. ... Nov. 53
Third software workshop held at Purdue University (N) ... Apr. 56
Wescon: it merely went through the steps (N) Oct. 47

Memories

A computerized file management system for manufacturing control. C. A. Renouard Dec. 60
Computer-behavior monitor features an associative memory (D&S) ... Jan. 60
Core memory controls production line. A. A. Vagge ... Aug. 46

ISSCC wrapup—1970: the year of the IC memory (N) ... Apr. 53
Memory costs to flatten, thanks to LSI (ABL) Apr. 141
New ferroelectric memory has nondestructive readout (D&S) ... Feb. 80
Punched cards make low-cost ROM's (D&S) Jan. 58
Putting memories to work on-line. S. J. Bailey Feb. 126
Semiconductor main memory for newest System/370 (N) ... Nov. 35

Metals processing and finishing

In-gap gaging improves strip mill control. F. Guetbauer ... July 57
Metal strip inspected by flying-field scanning (D&S) ... June 51
Siemens to automate cold strip mill (N) . June 47

Motor drives

A high-power switching amplifier. J. A. Ross July 50
Electric antibacklash drive (D&S) ... July 35
Modeling a thyristor dc motor control. F. Norman Lutz ... Apr. 70
Position control with a synchronous motor. O. Krauer ... May 66
Roll feed drive is digitally controlled (D&S) Apr. 59
Solid state sets new trends in motor drives. P. G. Mesniaeff ... Oct. 73
Speed control—four methods compared. Audeh & Deodhar ... Dec. 53

Nonlinear systems

A precision A-to-D converter for nonlinear conversion. W. C. Lin ... Apr. 92
Describing function analysis of a system with two nonlinearities. W. J. Guy & M. Kurland June 83
Design of a precise servo control system. G. Winston ... Mar. 84
Pseudo-random signals test nonlinear servos. Towill & Lamb ... Nov. 59
Rx: circle criterion for nonlinear system instability. E. Shapiro ... Mar. 81

Optical systems

Geometrical-optics control digital tape speed (D&S) ... Nov. 48
Laser automatically operates earth-moving equipment (D&S) ... Dec. 42
Metal strip inspected by flying-field scanning (D&S) ... June 51
Oddball and not so oddball applications of optical position sensors (D&S) ... Apr. 64
Simple linear or logarithmic light-level measurement (D&S) ... Feb. 79

Papermaking

Interactive control of paper machines. E. B. Dahlin ... Jan. 76

Pollution control

Automated sensing network monitors sulphur-dioxide pollution (D&S) ... May 60
Water, water everywhere, but—H. F. Hanson & A. Hess ... May 72

Pressure

Capacitance change senses differential pressure (D&S) ... June 52
Pressure transducer produces digital output (D&S) ... May 64

Priority interrupt

Computer time allocation eases on-line problems. W. Cunneen ... Mar. 71

Process control

A linear platinum resistance temperature detection circuit. Logan & Cook ... Dec. 58
All-digital gravimetic feeder satisfies process appetite (D&S) ... Dec. 41
Applying gas flow computers. B. Liptak . Dec. 46
Automated sensing network monitors sulphur-dioxide pollution (D&S) ... May 60
Automatic chemical analysis replaces 100 lab techs (D&S) ... Feb. 84
Barber-Colman unveils process controller line (N) ... Aug. 34
Building control networks uses 2-wire transmission (N) ... June 46
Computer time allocation eases on-line problems. W. Cunneen ... Mar. 71
Cooling water monitored in flow-through probes (D&S) ... Feb. 80
Design rule decision: rectangular or trapezoidal? R. Uram ... May 94
Economic justification for digital control of a batch process. R. G. Fritchie & E. F. Schagrin ... July 54
Fisher controls holds its 1970 process seminar (N) ... July 32
Fisher unveils ac^2 process controllers. (N) Jan. 46
Fluidic process controller scores on-line. Calvin & Streett Jr. ... Oct. 63
Foxboro taking part in transport control system (N) ... June 47
GE process computer is modular for flexibility (N) ... Jan. 50
High temperature controller maintains tight differential (D&S) ... Apr. 60
How octane monitor continuously analyzes gasoline (D&S) ... Sept. 44
Huge Getty oil line gets minicomputer control (N) ... Apr. 54
Instrument evaluation: catch as catch can. (ABL) ... Jan. 127
Instrumentation sales: 1970 looks good. (ABL) Feb. 203
Interactive control of paper machines. E. B. Dahlin ... Jan. 76
ISA has satisfying 25th birthday in a lean year (N) ... Dec. 35
Laser instrument gauges fine wires and fibers (D&S) ... Oct. 58
Moisture content in ceramic clays measured on-line (D&S) ... Aug. 40
Of process computers and manpower (ABL) Nov. 97
One digital controller for 16 ddc loops. Ray & Poll ... Apr. 75
On-line stream analysis with a chromatograph. R. D. McCoy & B. O. Ayres. ... July 44
Pneumatic-like prices, 'prefabs' for GE-MAC (N) ... Nov. 36
Protecting the computer in a process environment. Neumann & Riley ... Sept. 72
Rapid prediction of feedback system response peaking. J. Graeme ... Oct. 82
Refinery uses 90 miles of control cable. B. Kilpec ... Mar. 95
Simplified method for evaluating ISE and ITSE performance criteria. T. J. Pemberton Apr. 89
6 ways to control temperature. A. M. Willer May 86
Square tubing helps maintain adjustment of linkages (D&S) ... Sept. 43
Sun puts refinery under Foxboro ddc (N) Mar. 43
Symposium features control valves of the Seventies (N) ... May 54
System identification by on-line correlation. D. Dack ... Mar. 64
The pressure for change (ED) ... Dec. 96
Transient noise suppression in control systems. F. G. Willard ... Sept. 59
Ultrasonic flowmeter measures without touching (D&S) ... Aug. 40
U. S. fluidics industry sales: small but growing (ABL) ... Mar. 131
Using the PROSPRO I supervisory control equation as a ddc algorithm. M. A. Javinsky Nov. 57
Water, water everywhere, but—H. F. Hanson & A. Hess ... May 72
What price process instrument evaluation? Smith & Burton ... Dec. 50

Production control

A computerized file management system for manufacturing control. C. A. Renouard. Dec. 60
At Owens-Illinois it's computer to computer (N) ... Sept. 38
Bulb maker keeps in-machine data collectors "honest." R. L. Aronson ... Aug. 53
Core memory controls production line. A. A. Vagge ... Aug. 46
Digital techniques automate resistor testing (D&S) ... Jan. 62
In-plant sensors help schedule work and watch costs in brass rod mill. R. L. Aronson . July 40
Laser balances gyro and other high-speed precision rotors (D&S) ... Mar. 55
On-line production tracking aids integrated management system. R. A. P. Peters & F. Thumser ... Jan. 89
Plastic keys aid production monitoring (D&S) Sept. 44

Servomechanisms
(see also Digital servos)

Design of a precise servo control system. G. Winston ... Mar. 84
Growing servo market seen in Germany (ABL) Apr. 141
Position control with a synchronous motor. O. Krauer ... May 66
Pseudo-random signals test nonlinear servos. Towill & Lamb ... Nov. 59
Rapid prediction of feedback system response peaking. J. Graeme ... Oct. 82
Reversible step servo automatically returns to zero position (D&S) ... Nov. 46
Speed control—four methods compared. Audeth & Deodhar ... Dec. 53

Signal noise improvement

Transient noise suppression in control systems. F. G. Willard ... Sept. 59

Simulation

BART simulated run proves out controls (N) May 52
Boeing's jumbo jet inspires better simulator (N) ... Jan. 48
Design of a precise servo control system. G. Winston ... Mar. 84
Discrete simulation: new tool for control and system design. J. M. Burling ... May 77
New test setups boost car performance, safety (N) ... Feb. 67
Simulation of discrete processes: the seldom-used tool (ED) ... June 144

Solid state devices
(see also Integrated circuits)

Solid-state capacitor expands designers' range (D&S) ... May 62
Solid state circuit replaces mechanical balancing relay (D&S) ... June 54
Solid state sensors: strain gages. R. Iltis . Jan. 71

Speed control

Geometrical-optics control digital tape speed (D&S) ... Nov. 48
Solid state sets new trends in motor drives. P. G. Mesniaeff ... Oct. 73
Speed control—four methods compared. Audeh & Deodhar ... Dec. 53

Standards

What's new in control standards. Terminology Committee, AACC ... June 86

Switching techniques
(see also Logic)

New IC for zero-crossing switching (D&S) Jan. 58

Systems
Analysis

Computerizing Fourier analysis. J. R. Guerriero. ... Mar. 89
Describing function analysis of a system with two nonlinearities. W. J. Guy & M. Kurland June 83
Discrete simulation: new tool for control and system design. J. M. Burling ... May 77
Modeling a thyristor dc motor control. F. N. Lutz ... Apr. 70
Parameters quickly determined: second-order model with dead time. H. Vercammen & A. R. VanCauwenberghe ... Apr. 79
Rapid prediction of feedback system response peaking. J. Graeme ... Oct. 82
Rx: circle criterion for nonlinear system instability. E. Shapiro ... Mar. 81

Systems *continued*

System identification by on-line correlation. D. Dack ..... Mar. 64
Simplified method for evaluating ISE and ITSE performance criteria. T. J. Pemberton ..... Apr. 89

Design

Design of a precise servo control system. G. Winston ..... Mar. 84
Design rule decision: rectangular or trapezoidal? R. Uram ..... May 94
Don't overlook compatible NAND and NOR gates in reducing logic. L. B. Frenzel Jr. Oct. 70
On-line tradeoff: hardware versus software. L. Babiloni & others ..... Oct. 84
Systematic approach aids in fluidic system design. I. Kenig ..... Mar. 76
The digital IC filter: a low-cost signal processing tool. S. A. White & T. Mitsutomi . June 58
Two approaches to multiprocessing system design. T. B. Thomas & W. L. Arbuckle . Oct. 79

Engineering

Consult the users (ED ..... Aug. 82
One year later: computer systems firms continue to multiply and prosper. D. H. Surgan ..... Jan. 65
Systems vs nonsystems (ED) ..... July 104
The decade of engineering (ED ..... Jan. 144
The pressure for change (ED) ..... Dec. 96

Temperature

A linear platinum resistance temperature detection circuit. C. A. Logan & W. E. Cook Dec. 58
High temperature controller maintains tight differential (D&S) ..... Apr. 60
6 ways to control temperature. A. M. Willer ..... May 86
Temperature labels simplify operator checks (D&S) ..... June 52

Testing

Automated comparator makes for a smoother ride (D&S) ..... June 56
Digital techniques automate resistor testing (D&S) ..... Jan. 62
Justifying computerized testing. D. J. Bilinski ..... Apr. 82
New test setups boost car performance, safety (N) ..... Feb. 67
Pseudo-random signals test nonlinar servos. Towill & Lamb ..... Nov. 59
System identification by on-line correlation. D. Dack ..... Mar. 64

Transducers
(see also Digital transducers)

Acceleration sensor feeds back artificial feel for power assisted controls (D&S) ..... Mar. 58
Angle transducer uses differential capacitance (D&S) ..... Mar. 56
Automated sensing network monitors sulphur-dioxide pollution (D&S) ..... May 60
Capacitance change senses differential pressure (D&S) ..... June 52
Fluidic sensors protect dies (D&S) ..... May 62
Oddball and not so oddball applications of optical position sensors (D&S) ..... Apr. 64
Pressure transducer produces digital output D&S) ..... May 64
Solid state sensors: strain gages. R. Iltis . Jan. 71

Transportation

BART simulated run proves out controls (N) ..... May 52
Communications system provides vital link for automated highway (D&S) ..... July 36
Foxboro taking part in transport control system (N) ..... June 47

Water treatment

Water, water everywhere, but—H. F. Hanson & A. Hess ..... May 72
